

Research Information Sheet: Survey

Title of the Project: UT Austin AI Sentiment Study

UT Austin Investigator: Dr. Julie Schell, Director of the Office of Academic Technology

You are invited to be part of a research study. Your participation is voluntary and it is totally up to you to decide whether you want to participate. Even if you decide to be part of the study now, you may change your mind and stop at any time.

If you agree to take part in this study, you will be asked to complete an anonymous online survey about your use of artificial intelligence (AI) tools. The survey asks about which AI tools you use and how often, how you understand and work with AI, your attitudes and opinions about AI in education, and what training or support you feel you need. The survey does not collect your name, IP address, or any other identifying information. We expect the survey will take about 30 minutes. At the end of the survey, you will see a link to a separate, optional form. On that form you may enter a drawing for the chance to win one of fifteen \$40 Amazon gift cards, ask to be contacted about taking part in a focus group to discuss the survey topics in greater detail, or both. The drawing is open to everyone who completes the survey, regardless of whether you are interested in a focus group. The separate form will ask for your name and email. It is not connected to your survey answers, so your survey responses stay anonymous either way. Filling out the form is optional.
